WE ARE
HIRING

VACANT

Database Administrator

The Data Base Administrator Officer is responsible for the design, administration, maintenance, optimization and security of EFC Databases to ensure confidentiality, Integrity, availability and performance in line with EFC requirements.

What are we looking for?

A professional that shall:

- Access and assess 3rd party applications that require access to the databases to ensure that the integrity of the databases isn't compromised.

- Create automation for repeating database tasks

- Create and maintain database reports, visualizations, and dashboards.

- Implement database access control and data integrity
- Establish a framework for Upgrades (testing, user training) and deployment (including roll back plans) with the database developer.
- Implement the Business Continuity plan for the databases.
- Offer support to the different users and support teams as may be required.

A Degree in Computer Science or related studies is required. Two (2) years' experience in a similar role most preferably in a financial services sector is an added advantage. Knowledge in Linux and Windows and extensive experience with database technologies is preferred. Should be a good communicator, enthusiastic, have initiative, able to investigate and gather evidence with strong interpersonal, problem solving, analytical skills and ready to work after hours when required.

Send your applications to **recruitment@efcug.com**.

Deadline for submission: 1st July 2022.
